

This PeerStory is a collection of quotes from a real user sharing their experience using Zerto on PeerSpot.

**Craig Z.**

Virtualization Manager at  
Teknor Apex Company

## Use Case

We use Zerto for disaster recovery and DR testing.

## Valuable Features

I love Zerto's near synchronous replication because I can get up-to-the-minute data back in a disaster. This capability is essential because a disaster could cost the company money and even cause it to go out of business. **We can sleep better at night** knowing we can restore our systems in minutes.

## Results

Zerto has also improved our DR testing. In the past, we had to test

**“Zerto has improved our restoration time and made it easier to test software upgrades.”**

**“It gives us peace of mind that we can recover our systems in minutes or hours instead of days.”**

over the weekend, but we can now do it during the work week without any outages. Our IT staff doesn't need to come in over the weekends, so it doesn't affect their personal lives. **Zerto has reduced our DR testing time by about 50 hours.**

## ROI

When we had a firmware failure, it saved us time performing a failover to our DR site... **It saved us days and possibly weeks of downtime.**
