

Zerto Cloud Vault

What's in it for MSPs?

Zerto Cloud Vault can be offered by MSP partners to customers using Zerto. Zerto adds data copies from the recovery journal for immutable cyber recovery. Combined with Zerto encryption detection, isolated recovery, and non-disruptive testing, the MSP solution, powered by Zerto, protects recovery data from cyber attackers for confident recovery as a service.

Hosting Use Cases

Cloud Vault Only

Production and DR are on-prem and cloud vault is hosted

DRaaS and Cloud Vault

Production is on-prem and DR and cloud vault are hosted

Fully Managed

Production, DR, and cloud vault are all hosted and managed

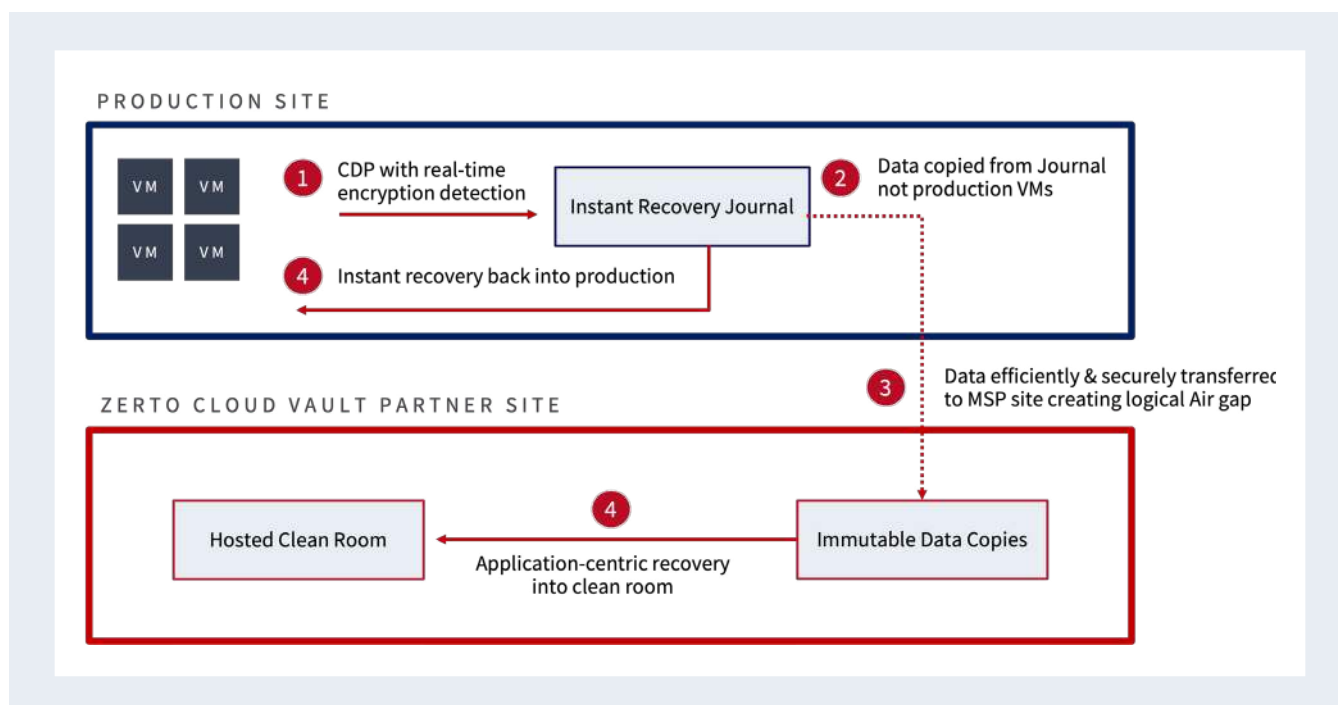

Benefits

Drive more data protection business by offering the cloud vault and recovery services

Unlock new use cases within existing and new customer base

No additional license cost with Zerto Cloud Vault

Built on known Zerto product

How it Works

- Secure, logically air-gapped, cloud-based, immutable vaulting
- Cyber recovery expertise and services from hosting to full-service protection and recovery
- Isolated, cleanroom recovery to validate data and perform forensic investigation
- Detection of encryption anomalies within seconds to alert to potential ransomware attacks
- Non-disruptive recovery testing to validate recovery plans and train incident response teams
- Meets regulatory compliance requirements

About Zerto

Zerto, a Hewlett Packard Enterprise company, empowers customers to run an always-on business by simplifying the protection, recovery, and mobility of on-premises and cloud applications. Zerto eliminates the risk and complexity of modernization and cloud adoption across private, public, and hybrid deployments. The simple, software-only solution uses continuous data protection at scale to solve for ransomware resilience, disaster recovery, and multi-cloud mobility. Zerto is trusted by over 9,500 customers globally and is powering offerings for Amazon, Google, IBM, Microsoft, and Oracle and more than 350 managed service providers. www.zerto.com
